Dear Rich,

I was nervous when we changed GoldMine consultants last September. Having never lived through a major software conversion without significant unplanned down time, I was extremely uncomfortable when we made the massive upgrade/conversion over this Easter weekend. Bob Francis and you did an outstanding job for us.

I am becoming a believer, and Ticomix is the primary reason. You folks have exceeded all expectations! Despite my initial nightmares, our business has run smoothly since. The Easter weekend upgrade, with its improved functionality has allowed us to achieve increased productivity.

We clearly made the right choice when we partnered with Ticomix. Keep up the good work!

Best regards,

Gregg Johnson
